FIELD AGRICULTURAL COUNCIL TOUR TO UKRAINE

June 21 – July 9, 2026

PROGRAM DESCRIPTION

We warmly invite you to join us in Ukraine from June 21 to July 9, 2026, for a truly special experience — a journey that blends agricultural learning with cultural discovery, during a time when every visit means more than ever.

This tour is a 50/50 mix of hands-on agricultural education and sightseeing, thoughtfully designed to offer you both insight into Ukraine's leadership in soil fertility, microbiology, entomology, and disease management — and a deep connection to its history, its resilient people, and its beautiful landscapes.

Throughout the tour, you'll visit flourishing fields of soybean, corn, wheat, barley, sunflower, canola, and many niche crops such as alfalfa, buckwheat, millet, ryegrass, and flax. You'll meet farmers working small family plots and large agricultural enterprises, and see firsthand the innovation driving Ukrainian agriculture today.

At each stop, you'll have a choice: you are welcome to join in the fieldwork discussions and analyses — or, if you prefer, explore local historic sites, charming towns, and cultural landmarks through carefully organized sightseeing options.

Whether your passion lies in agriculture, history, or simply discovering the true spirit of Ukraine, there will be a place for you on this journey.

The tour will conclude with a gathering and conference, where participants, farmers, and experts come together to reflect and share insights. Comfortable seating and sunshades will accompany you during the farm visits, ensuring an enjoyable experience.

More than a tour, this is a chance to walk alongside Ukrainians — to witness not only their agricultural achievements but their extraordinary resilience and vibrant culture, in the face of the greatest challenges.

We invite you to stand with Ukraine, learn with Ukraine, and be inspired by Ukraine.
